 SUBJECT: 3.8% Increase – Impact to Monthly Sewer Bill

The projected 2022 rate increase of 3.8% will be applied to the BCRSD's Base Service Fee and the volume-based treatment cost. You may expect to see these changes on your July bill (with only the rate increase applied for the consistent volume treatment of 3,167 gallons).

The increase to your sewer bill will be as follows:

	Water Usage Avg	Base Service Fee	Treatment Cost	Total Sewer Bill
2021	3167 gallons	\$26.65	\$24.86	\$51.51
2022	3167 gallons	\$27.40	\$26.60	\$54.00

The increase to an average sewer bill based on 5,000 gallons of treatment will be as follows:

	Water Usage Avg	Base Service Fee	Treatment Cost	Total Sewer Bill
2021	5000 gallons	\$26.65	\$39.25	\$65.90
2022	5000 gallons	\$27.40	\$42.00	\$69.40
