

Memo to Board

March 14, 2023
From Virgil Farnen
Operations Manager

RE: Purchase of Crane Truck Chassis and Tool Body

I placed an order for a Crane Truck and Tool Body to replace our existing crane truck. We are having our existing crane mounted on the new chassis when it arrives.

The Board budgeted \$ 165,000.00 for the new chassis and tool body. The purchase price of the truck and tool body is \$ 170,046.93 This truck will not be delivered until the 3rd quarter of 2024.

The purchase agreement has the following paragraph:

At present, this price includes all updated commodity surcharges. While we here at Rush Truck Center of Jefferson City make every attempt to ensure accurate pricing, if future surcharges due to the instability in material costs and body delays that may happen, this pricing is subject to any additional surcharges at the time of manufacturing.

Adjustments to the budget amount, for the amount due when delivered will need to be reflected in your 2024 budget.
