Important Information About Securities Line, Cash Reserve and Business Reserve

INTEREST CHARGE CALCULATION:
 We figure the interest charge on your account by applying the daily periodic rate to the "daily balance" of your account for each day in the billing cycle. To get the "daily balance", we take the beginning balance of your account each day, add any new advances and subtract any credits or payments for that day. This gives us the daily balance. We add each day's interest charge to get the total interest charge which is shown on your monthly statement.

To calculate the Average Daily Balance noted in the Balance Subject to Interest Rate column we add up all the daily balances for the billing cycle and divide the total by the number of days in the billing cycle. This gives us the "average daily balance". The interest charge may be calculated by multiplying each of the average daily balances by the applicable daily periodic rate, multiplying the results by the number of days in the billing cycle divided by 365 and adding together to get the Total Interest For This Period.
