Dear Board of Trustees,

There is a consideration item in your packet to amend the general services contract with Bartlett in West to do a full hydraulic analysis. Additionally, we have issued an RFP to obtain Barnes Razor OGP pumps to place within the Hillcreek system to improve service at the properties that are most hydraulically remote within this system. We will be able to identify when and where these pumps are replaced within this system and track this within the GIS system. We will begin the hydraulic analysis assuming the board approves the contract amendment with Bartlett and West. The ultimate goal here is to reduce the overall number of service calls within the Hillcreek system, which will reduce our overall pressure sewer service costs. We will have pricing back for the pump purchase at the September meeting for board consideration.

Jesse Stephens, Facilities Engineering Manager
Boone County Regional Sewer District (BCRSD)
