---

Dear Board of Trustees,

As discussed at our previous meeting, the existing Vacuum truck is in disrepair and would require an expensive motor rebuild to be functional. This piece of equipment was scheduled to be replaced in 2026, and this action needs to be taken now in order to get the new truck in our possession within a reasonable time frame. We believe this truck will be available for us in February. Additionally, our financial advisor recommends that we pass a reimbursement resolution that will allow us to consider lease purchase options at a later time if market conditions become favorable or if the District determines that cash flow is needed at a later date. Currently, we have no cash flow issues and we anticipate making a cash purchase.

I'm seeking two motions.

Motion 1: Allow the executive director to purchase a 2,500 gallon vacuum tanker truck via the sourcewell cooperative purchasing program and work with Key Equipment via this program to make the purchase of the truck described in the attached quote of Model: SEP 2500 1CPT AL on Freightliner

Motion 2: Approve the attached reimbursement resolution.
