Dear Board of Trustees,

Boone County Resource Management has been working for a couple of months now on updates to the On-Site Wastewater regulations for Boone County. Some of the work has been to clean up inconsistencies that existed when the Commission transferred the program from the Health Department to Resource Management. There are several references within the regulations that require cost benefit analysis for connection to public sewer. It is our goal to get the health department regulations coherent with the other applicable regulations, including the BCRSD user regulations.

Roy Kroeger and myself will be scheduling stakeholder engagement meetings for these proposed changes, and one of the key stakeholders is BCRSD. We will make a presentation of the changes at a future board meeting either in December or January.

Part of this will include GIS mapping that identifies areas that are within 1,000 feet of public sewer. This mapping will be shared with BCRSD to help identify the growth areas within each sewer shed that BCRSD maintains.

Parallel to this, there is also a project in Muni-Link to identify every property by Water District, Treatment Plant, Pump Station, and Neighborhood. This additional GIS data will be integrated into mapped existing and future services areas for BCRSD facilities.

Jesse Stephens, P.E., Executive Director
Boone County Regional Sewer District (BCRSD)
